Ogheneovie Collins Vincent

SENIOR FULL-STACK ENGINEER · MERN · REACT NATIVE

Port Harcourt, Rivers State, Nigeria | +234 704 152 8380 | vincentovie39@gmail.com | vincentcollins.netlify.app | linkedin.com/in/codrexy

PROFILE

Full-stack engineer with eight years shipping live web and mobile products in payments and fintech — including Puplar's payment platform, the 4GeeHub gift-card trading app, and the Activ8 benefits app. I work end to end across React, Next.js, and React Native on the client and Node.js/NestJS services behind them, and have led cross-functional teams of 5–15 from discovery through store release.

EXPERIENCE

Full-Stack Developer

Apr 2023 — Aug 2026

Usepuplar (Puplar) · Port Harcourt

- Built and shipped three production surfaces of Puplar's cross-border payment platform — the marketing site (puplar.com), the merchant dashboard (business.puplar.com), and the customer app (app.puplar.com).
- Implemented merchant onboarding and KYC flows, multi-currency wallets, payout requests, and transaction histories in React and TypeScript against NestJS services.
- Restructured client data fetching around Redux Toolkit Query, removing duplicate requests and cutting median dashboard interaction time by roughly 40%.
- Designed PostgreSQL schemas and REST endpoints for authentication, payments, and reporting, covered by automated tests that reduced regressions reaching production.

Chief Digital Officer

Jul 2024 — Jan 2026

Definity Innovations & Solutions · Port Harcourt

- Set technical direction across the company's product portfolio, including the 4GeeHub gift-card trading app and the Activ8 lifestyle benefits app, and led a cross-functional team of 15.
- Introduced a shared component library and CI/CD pipeline that cut new project setup from weeks to days and standardised quality across teams.
- Ran scoping and roadmapping for new engagements, and set review, release, and on-call practices for predictable deployments.

Senior Frontend Developer

Nov 2022 — Oct 2023

Techfaithful · Port Harcourt

- Rebuilt the customer dashboard in Next.js with server-side rendering, improving first-contentful paint on the low-bandwidth connections most users were on.
- Established reusable UI patterns in TailwindCSS and MUI, replacing one-off styling and shortening the build time for new screens.
- Mentored three mid-level developers through structured code review and pairing, lifting review turnaround and consistency across the team.

Senior Mobile App Developer

Feb 2022 — Mar 2023

Expectoo Nigeria · Port Harcourt

- Shipped a cross-platform React Native app to the App Store and Play Store, covering onboarding, in-app payments, and push notifications from a single codebase.
- Cut cold-start time and crash rate through profiling, list virtualisation, and offline-first caching, improving first-week retention.
- Built the release pipeline for staged rollouts and over-the-air updates, shortening the fix-to-user cycle from days to hours.

Full-Stack Web & Mobile Developer

Mar 2020 — Nov 2022

The Devsyners · Port Harcourt

- Delivered 12+ client web and mobile products on the MERN stack as lead developer, covering scoping, architecture, deployment, and post-launch support.
- Integrated third-party payment, SMS, and analytics providers, and moved releases to automated builds to remove manual deployment errors.

Full-Stack Web Developer & Instructor

Jul 2017 — Jan 2020

Harvoxx Tech Hub · Rivers State

- Built responsive websites and internal tools in JavaScript, Node.js, and MySQL for small-business and NGO clients.
- Taught web development fundamentals to training cohorts, writing exercises and reviewing student projects.

Puplar — global payment infrastructure for businesses

React · TypeScript · NestJS

puplar.com business.puplar.com app.puplar.com

Web developer across all three surfaces: the marketing site, the merchant dashboard for collecting payments and requesting payouts, and the customer app. Built onboarding and KYC flows, multi-currency wallets, transaction views, and reporting exports against one shared API layer.

4GeeHub — gift-card and crypto trading app

React Native · Node.js

4geehub.ng Google Play & App Store

Mobile app developer on a trading app that converts gift cards to cash or crypto. Implemented live gift-card and crypto rate feeds, BTC and USDT payouts alongside bank transfers, PIN-based two-factor authentication, exportable transaction history, and the store release cycle.

Activ8 — lifestyle benefits platform

React Native · Next.js

activ8.ng Google Play & App Store

Web and mobile developer on a members' benefits app offering curated deals across health, fitness, travel, entertainment, and finance. Built partner-offer browsing, membership and benefit management, service booking, and secure sign-in from one design system across web and app.

CORE SKILLS

Frontend
React, Next.js, Vue.js, TypeScript, Redux Toolkit & RTK Query, TailwindCSS, MUI, CSS3

Mobile
React Native, Expo, native modules, App Store & Play Store release

Backend & Data
Node.js, NestJS, Express, REST APIs, PostgreSQL, MongoDB, MySQL

Delivery
Git, CI/CD, testing, code review, Agile planning, team leads of 5–15

EDUCATION

B.Sc. Computer Science

Sep 2022 — Sep 2026

Ignatius Ajuru University of Education, Rivers State

ADDITIONAL

Languages
English — professional working proficiency

Availability
Open to remote and hybrid engineering roles
